

SALMA AYMAN MOHAMED ABDELMOHSEN

Communication and Electronics Engineering Student

Location: Giza, Egypt | Phone: 01555061220

Email: salmaayman5421@gmail.com | LinkedIn: linkedin.com/in/salma-ayman-9b2b44214

EDUCATION

Bachelor of Science in Communication and Electronics Engineering

Egyptian Academy for Engineering and Advanced Technology

* Relevant Coursework: Solid State Electronics, Advanced Electronics,
Instrumental Analysis, Logic Circuit Design.

High School Diploma

Ibn Sina Language School

TECHNICAL PROJECTS

Porous Materials & Structures Engineering Project (Full Lifecycle)

Electronics & Communications Engineering Department

* Developed a comprehensive project focusing on the design, analysis, and
implementation stages of electronic systems integrated with porous structures
for specialized engineering applications.

* Stage 1: Research & Characterization: Conducted instrumental analysis to
evaluate the physical and electrical properties of porous substrates, focusing

on permittivity and structural integrity.

- * Stage 2: Design & Simulation: Modeled signal propagation and thermal dissipation through porous mediums utilizing CAD tools, validating performance boundaries before physical prototyping.
- * Stage 3: Testing & Optimization: Built and tested the physical prototype across multiple operational phases, refining sensor integration and signal filtration to mitigate noise caused by material porosity.

Digital Stopwatch Project (4-Digit MM:SS Timer)

- * Implemented hardware counting logic to track and display minutes and seconds up to 59:59 using pure combinational and sequential logic circuits via IC 4026 and 555 timers.
- * Integrated start, pause, and reset mechanical push buttons by deploying hardware-based debouncing circuitry without utilizing microcontrollers.
- * Executed full-circuit behavioral simulation in Proteus to ensure timing accuracy and structural stability before physical assembly.

WORK & VOLUNTEERING EXPERIENCE

Public Relations Head

IBSRA

- * Co-founded the tech company and spearheaded the public relations strategy to position the organization within the scientific community.
- * Directed the PR committee, managed external outreach, and orchestrated communications to bridge engineering and biomedical research initiatives.

Customer Service Agent (English Account)

Informa Markets | July 2024 – October 2024

- * Managed high-volume concurrent inquiries from international exhibitors, contractors, and visitors, dynamically switching between English and Arabic chat flows.
- * Awarded "Best Customer Service Agent" during the second month of employment due to exceptional crisis management and smooth resolution of complex client disputes.

CEO

Scientific Research Society (SRS) | July 2021 – July 2022

- * Oversaw organizational strategy and boosted cross-functional team operational efficiency by 55% within six months by aligning project tasks with individual member technical needs.
- * Directed the planning and execution of the offline Ultimate Youth Movement (UYM) event and launched multiple internship tracks to raise student awareness about scientific research and self-development.

PR Committee Member & Organizer

Nafsak Initiative / Students Retreat Event | March 2021 – August 2022

- * Formulated and pitched partnership proposals to secure sponsorships and corporate backing from mental health organizations across the MENA region.
- * Contributed to the successful organization of the 1st Mental Health event in the MENA region.

COMPETITIONS & AWARDS

* Cybersecurity Academy Graduate (Undergraduate Level) | NTI & NTRA (2025):

Successfully completed 60 technical hours and 12 freelance hours focused on foundational cybersecurity architectures, authorized by the Ministry of Communications and Information Technology

* Semi-Finalist | Tatawwar Programme (February 2022): Developed and presented

a reservoir system concept engineered to harvest rain water and convert it into clean electrical energy, backed by HSBC and Potential.com.

* Green Zone Delegate | United Nations Climate Change Conference (COP27):

Awarded official Green Zone Access at Sharm El Sheikh for sustainability and climate engagement.

* Scholarship Recipient | Immerse Education Competition: Awarded a 20%

scholarship for the Computer Science Program at Cambridge University for a research essay analyzing artificial intelligence safety and human risk factor limitations.

* Cohort Graduate | MINT Squad Program: Completed an intensive financial

literacy and entrepreneurship track delivered by EGBANK and OBM Education

* International Delegate | Stanford Students Climate Change Program: Selected

for virtual training exploring climate modification systems and the utilization of Virtual Reality (VR) environments in modern education.

* Pre-Finalist | International Youth Math Challenge (IYMC 2020): Certified

for advanced mathematical capabilities and logical problem-solving prowess

(Ref: 148628.jpg).

SKILLS & CORE COMPETENCIES

- * Engineering Tools: Proteus, AutoCAD, Hardware Circuit Testing, Instrumental Analysis.
- * Software & Design: C Coding, Python (Beginner), Adobe Photoshop.
- * Languages: Arabic (Native), English (Fluent), German (Beginner / Aiming for B1).
- * Professional Competencies: Strategic Planning, Crisis Management, Cross-Functional Leadership, Business Development Partnerships.

EXTRA-CURRICULAR INITIATIVES

Founder & Creative Director | Notebooks Startup

- * Launched an independent e-commerce brand specializing in custom stationery and notebooks, managing full inventory, design pipelines, and digital marketing outreach.
